

# SMARTWATER THE ULTIMATE THEFT DETERRENT

## What is SmartWater?

Smartwater is a special liquid used to protect your valuables and premises from criminals.

Each bottle of SmartWater contains a different mixture of chemical ingredients. There are millions of different combinations and each bottle is as individual as a fingerprint.

Once dry it is virtually impossible to remove SmartWater from your valuables and it will glow under ultra-violet light.

SmartWater is simply painted onto your property, such as mobile phones or televisions, and can even be sprayed onto criminals.

Each bottle of SmartWater is registered to its owner and their details are kept on a database. Because each bottle of SmartWater is one of a kind, police officers can check the database to identify where a sample of SmartWater came from and who it belongs to.

95% of police forces across the UK are currently using SmartWater to help stop burglary, robbery, vehicle crime, and race crime.

SmartWater is being used in homes, schools, and businesses around the country.

## Criminals know about SmartWater. And they hate it.

Because the unique chemicals within SmartWater are linked to its owner, this means that criminals can also be connected to a crime scene, even long after a crime has taken place.

Over 400 criminals have been caught and convicted so far, and SmartWater has a 100% conviction rate. This means that EVERY criminal caught by SmartWater has been prosecuted and sent to prison.
